[Data for SCRIBE Project.zip](#)
[PAVILLION.MDB](#)

This might be what you're after. I see the third grouping in the list has the sample lab results that I loaded into SCRIBE.

Mark,

Please find the attached database and data to upload.

There are three folders in the zip file:

1. All Data and QC needs to be loaded - all lab result data should be loaded, including appropriate QC data.
2. All data and QC that needs to be updated from previous SCRIBE entry - R8 lab issued amended EDD for what appears to be one sample collected as part of the Jan 2010 sampling event (PGMW01). The appropriate records should be updated in SCRIBE.
3. QC needs to be loaded - I have loaded the sample lab results into SCRIBE; The QC data should also be loaded.

We continued to have problems surrounding the naming of our samples. The issue with the last two rounds of samples have been associated with Blanks. All samples collected needed to have unique sample names, which wasn't the case (We had multiple "TRIP BLANK"s that needed unique IDs). So, I have been uploading the lab IDs from the different EDDs as the Unique Sample Numbers in SCRIBE.

Please feel free to call with any questions! I look forward to our call at 2.
